Entertainment

Connect a notebook to a 10/100Mbps network

This PC Card automatically recognizes the speed of the network and can switch back to 10 Mbps when used for a 10 Base-T network. The SP100TCL is suitable for all notebooks that support 32 bits card bus. The PC-Card only uses 3,3 V in comparison to a regular PC Card which uses 5 V.

Specifications

General specifications:

- Type II PCMCIA PC-Card (32 bit)
- Compliant with IEEE 802.3 & IEEE 802.3U standard.
- 10Base-T/100Base-TX LAN auto select.
- LED indicators: 10/100/ACT
- Built in 32 kB high speed
- SRAM for data buffering
- Low power consumption (3,3V)
- Supports wake up on LAN
- NE-2000 compatible.
- "Full Duplex" support.
- Drivers:
  - Novell Netware
  - Netware Lite
  - Microsoft LAN manager
  - Microsoft Windows for Workgroups, Windows 95/98/ME/2000/XP, Linux and Windows NT 4.0
- NetBIOS
- Banyan Vines 5.5
- Lantastic
- IBM OS/2 Warp 3.0
- Packet driver application

Included accessories:

- Multi language manual

Minimum system requirements:

- Celeron/Pentium II 300Mhz
  Available PC-Card slot type II or III

Warranty:

5 year
